SKILLS

- Flutter & Dart
- React & Next.js
- Supabase & PostgreSQL
- TypeScript / JavaScript
- Git & Deployment

LANGUAGES

- English | Professional
- Burmese | Native

STRENGTHS

- Fast independent learner
- End-to-end project ownership
- Clear technical communication
- Problem-solving mindset

HOBBIES

- Exploring new frameworks
- Game design & Unity
- Tech & startup content

EDUCATION

Rangsit University
B.Sc. Information & Communication Technology
Final-Year · Bangkok
Expected 2027

SUMMARY

Final-year ICT student with hands-on experience designing, building, and independently deploying full-stack mobile and web applications used by real businesses. Comfortable owning a project end-to-end — database schema, backend logic, UI, and production deployment — using Flutter, React, Next.js, and Supabase. Seeking a software development internship in Bangkok or remote.

EXPERIENCE

Freelance Web Developer

ICT for Development Team · Remote · 2023 – Present

- Designed and built client websites, including a social welfare organization (brahmaso.org.mm) that is currently live and in active use.
- Managed full project lifecycle independently — requirements through deployment — for small businesses and non-profits in Myanmar.

PROJECTS

Royal Ph7 — Water Delivery App

Flutter · Dart · Supabase · GoRouter

- Built a full-stack delivery platform with three user roles (customer, driver, admin) and real-time order tracking via Supabase streams.
- Implemented live in-app chat, scheduled delivery time slots, and driver shift management.

Water Factory — Business Management System

Next.js 14 · TypeScript · Supabase · Vercel

- Designed a multi-city system with Row Level Security to isolate branch data, supporting driver dispatch and settlement tracking.
- Built credit-supported sales, real-time stock management, and automated 3-month data retention via Vercel cron.
